

27 Years of Contract Laser & Waterjet Services

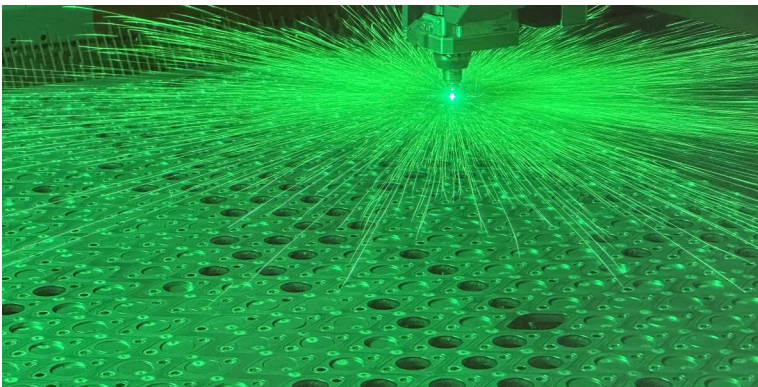

Cutting is our Business

Whether your cutting needs are metallic or non-metallic we've got you covered. We have essentially processed all grades of materials. Coupled with our in-house machining capabilities we are your one stop shop.

CALL OUR EXPERT STAFF TODAY, 763-784-4600

We are pleased to announce our laser installation is nearing completion and are on track to finish it soon. Our team has been working tirelessly to ensure the installation meets all safety standards and is ready to be used. We appreciate your patience during this process and look forward to sharing more updates with you as we moved forward. Once the installation is complete, we will be able to provide enhanced services and capabilities to better serve our customers. Thank you for your continued support.

"NEW" in July, 20K Fiber

Custom cutting of aluminum, stainless steel, copper, carbon steel and other metals is just the beginning of the laser applications at Fedtech. With a range of power densities, our laser cutting systems are ideal for both large and small scale applications. Laser technology changes quickly; we stay on top of it.

Our Equipment = 's High Standards

- Production built laser Machinery
- Annual machine calibration schedules
- Rigorous maintenance schedule on all machinery
- Part tolerances as close as +/- .005"
- ISO 9001:2015 certification

A History of excellence: Our Journey Since 1996

Since our inception in 1996, we have been driven by a single purpose: to provide unparalleled cutting services to the manufacturing world. Our dedication to quality, innovation and customer service has allowed us to grow and adapt to the changing needs of the industry. Over the years, we have expanded our services and capabilities, continuously investing in the latest technology and equipment to ensure we remain at the forefront of the cutting service industry.
